# Navigating NIS2 Compliance with Ontinue and Microsoft

Essential Reflections – Checklist (1:2)

SCOPE AND IMPACT ASSESSMENT

Does our organization fall under the expanded scope of essential or important entities as defined by NIS2, and how does this designation impact our current cybersecurity obligations?

RISK MANAGEMENT

How effective are our current risk management policies and practices in identifying, assessing, and mitigating cybersecurity risks in line with NIS2 requirements?

INCIDENT HANDLING

Do we have a robust incident response plan that complies with NIS2's mandates for timely detection, reporting, and management of cybersecurity incidents?

SUPPLY CHAIN SECURITY

Have we evaluated the cybersecurity risks associated with our supply chain and third-party vendors to ensure compliance with NIS2's focus on key supply chains?

CYBERSECURITY PRACTICES

Are our cybersecurity measures, including basic cyber hygiene practices and advanced cybersecurity training for employees, sufficient to meet NIS2 standards?

Essential Reflections – Checklist (2:2)
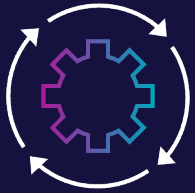

TECHNICAL MEASURES
How do our technical security measures, such as the use of multi-factor authentication, encryption, and secured communications, align with NIS2's requirements?
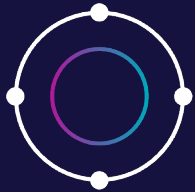

LEGAL AND REGULATORY COMPLIANCE
Are we fully aware of the reporting obligations, required cooperation with local authorities, and the potential for high penalties under NIS2 for non-compliance?

MANAGEMENT ACCOUNTABILITY
Does our management understand their role and potential personal accountability in ensuring the organization's cybersecurity measures are compliant with NIS2?

PARTNERSHIP AND COLLABORATION
How can partnerships, such as the one between Ontinue and Microsoft, enhance our ability to comply with NIS2 through advanced technologies and expert services?

CONTINUOUS IMPROVEMENT
What strategies do we have in place for continuous monitoring, assessment, and improvement of our cybersecurity posture to adapt to the evolving NIS2 requirements and threat landscape?
